### **DETAILED ACTION**

# Claim Rejections - 35 USC § 101

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

2. Claims 45-52,61-68 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. As per the most recent interpretation of the Interim Guidelines regarding 35 U.S.C. 101, claims 45-52 define non-statutory processes because they merely manipulate an abstract idea (a mathematical comparison of two signals) without a claimed limitation to produce a useful, concrete, tangible result. If the acts of a claimed process manipulate only numbers, abstract concepts or ideas, or signals representing any of the foregoing, the acts are not being applied to appropriate subject matter (Benson, 409 U.S. at 71-72, 175, USPQ at 676). Furthermore, claims define nonstatutory processes if they simply manipulate abstract ideas (Warmerdam, 33 F.3d at 1360,31 USPQ2d at 1759). As for guidance to areas of statutory subject matter, see 35 U.S.C. 101 Interim Guidelines (with emphasis of the Clarification of Interim Guidelines For Examination of Patent Applications for Subject Matter Eligibility); as an example, in Alappat, the claimed output smooth waveform (consisted of lighting pixels on an oscilloscope/display) is a useful, concrete, tangible, final result; in Arrhythmia, the claimed useful, concrete, tangible, final result represented the condition of a patient's heart; in State Street, the claimed useful, concrete, tangible, final result was data output Application/Control Number: 09/706,227 Page 3

Art Unit: 2626

that represented a final share price momentarily fixed for recording and reporting purposes and even accepted and relied upon by regulatory authorities and in subsequent trades. Claims 61-68 are also non-statutory under the most recent interpretation of the Interim Guidelines regarding 35 U.S.C.101 because although this claim is toward a computer readable medium, as claimed, it is not clear as to what is a computer readable storage medium is (according to the specification, it can be the network that stores the information), and as such, would not define the structural and functional interrelationship between the computer program and other claimed elements of a computer which permit the computer program's functionality to be realized (Warmerdam, 33 F.3d at 1361,31 USPQ2d at 1760; Lowry, 32 F.3d at 1583-84, 32 USPQ2d at 1035). Examiner notes that as per claims 61-68, modifying the computer readable storage medium to read on the either the disclosed database or server would overcome the 35 U.S.C. 101 rejection for claims 61-68.

### Allowable Subject Matter

- 3. Claims 45-68 are allowable over the prior art of record.
- 4. The following is a statement of reasons for the indication of allowable subject matter:

As per the independent claims, the claim recitations pertaining to a plurality of reference works having a known segment size and a known hop size and the predetermined hop size of each of said plurality of segment of the sampled work is less

Application/Control Number: 09/706,227 Page 4

Art Unit: 2626

than the known hop size of the reference work is not explicitly taught by the prior art of record .

## Response to Arguments

5. Applicant's arguments filed 8/29/2008 have been fully considered but they are not persuasive. As per applicants arguments that the claims identify an unknown sampled work (as being the useful, concrete, tangible result), examiner disagrees and argues that the claims still do not fall into one of the enumerated statutory classes: Claims 45-52 are not directed toward: 1) a process (nothing is processed/transformed - a calculation/comparison is performed); a statutory "process" under 35 USC 101 must (a) be tied to another statutory category (such as a manufacture or a machine), or (b) transform underlying subject matter (such as an article or material) to a different state or thing. Claims 45-52 neither transform underlying subject matter nor positively recite structure associated with another statutory category, and therefore do not define a statutory process.); 2) a there are no claim elements towards an appropriate apparatus, e.g. the elements of a device that would perform the claim steps.3) a manufacture (no claim elements pertain to an output product; nor 4) a composition of matter. Newly submitted claims 61-68 are also rejected under 35 U.S.C. 101 as noted above (the claim scope must further define which 'computer readable storage medium' is referred to).

#### Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael Opsasnick, telephone number (571)272-7623, who is available Tuesday-Thursday, 9am-4pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mr. Richemond Dorvil, can be reached at (571)272-7602. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
